

ABIGAEAL NJERI

FRONTEND DEVELOPER

Dear hiring manager,

I am excited to apply for the Frontend Developer position at your organization. With a Diploma in Computer Programming and hands-on experience building responsive, user-focused web applications, I have developed a strong foundation in frontend development and a genuine passion for creating digital experiences that are both functional and intuitive.

In my current role at Value Chain Factory, I contribute to the development and improvement of web solutions, applying my frontend skills to build responsive interfaces and deliver practical solutions to real-world requirements. This experience has strengthened my ability to understand project requirements, troubleshoot issues, collaborate with others, and continuously improve the quality of my work.

My technical experience includes React, JavaScript, TypeScript, Vue.js, HTML, CSS, Tailwind CSS, Bootstrap, REST APIs, Git and GitHub. I enjoy transforming ideas and designs into clean, responsive and user-friendly applications, while paying close attention to functionality, usability and detail.

Beyond my technical skills, I am detail-oriented, adaptable and eager to take ownership of my work. I value collaboration, constructive feedback and opportunities that challenge me to grow. I would be excited to bring my skills, creativity and strong work ethic to your team while contributing meaningfully to the products and solutions you build.

Thank you for considering my application. I would welcome the opportunity to discuss how my experience and skills could contribute to your team.

Your sincerely,
Abigeal Njeri
